Guardian of Light

The program we are concerned is the eternal spirit inherent lighthouse. It is not due to human technological progress and evolvement, or die because of the changing times; it is the faith of survival for human to live between sky, land, and sea. Therefore, we hope that the future of the lighthouse can continue this spirit, in a guardian form to exist.

The lighthouse consists of three parts: the smart aura on top, body and base support structure, a living compartment.

Smart aura is composed of 32 high-energy spotlights; they will cast to the sea forming a ring composed of the 32 spots through intelligent control. With this ring to protect the passing ships and escort them away, to reflect the way of love between lighthouse and the people on the sea. The lighthouse is no longer just a logo or guidance; it has learned to communicate with people and express its emotion.
