SUB. CAPTURED

LOW TIDE / AQUARIUM / SUB

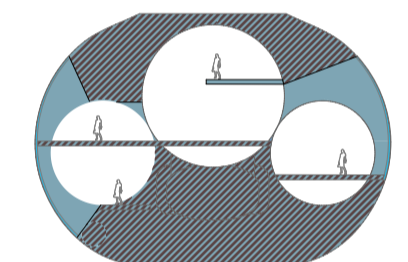

**AQUATIC - SUB - MISSION**

THE TYPHOON CLASS SUBMARINE IS PLACED IN AN AQUARIUM, LOCATED ON A SITE WITH HIGH TIDAL RANGE. AN AQUATIC ENVIRONMENT WITH FISH, CORALS AND PLANTS COHABIT THE AQUARIUM TOGETHER WITH THE SUBMARINE.

THE SUBMARINE DELIVERS SEVERAL FACILITIES OF FUNCTIONS; A SCIENCE RESEARCH PARK FOR AQUATIC ENVIRONMENTS, AN ADVENTURE CENTER, AN HOTEL AS WELL AS THAT OF LARGER SERVICE FACILITIES. THE NUCLEAR REACTORS WILL BE PRESERVED AND UTILIZED AS AN ENERGY BANK FOR SYSTEMS.

DURING LOW TIDE, VISITORS WILL BE ABLE TO WALK AROUND THE OUTSIDE OF THE AQUARIUM AND CLOSELY STUDY THE PLANTS, ANIMAL LIFE AND THE GIGANTIC TYPHOON SUBMARINE SUBMERGED, IN GREAT CONTRAST TO THE REMAINING SCENERY. ADDITIONALLY, THE AQUATIC ENVIRONMENT WITHIN THE AQUARIUM WILL BE A DISTINCTIVE FEATURE IN COMPARISON TO THE COLD BLUE OCEAN.

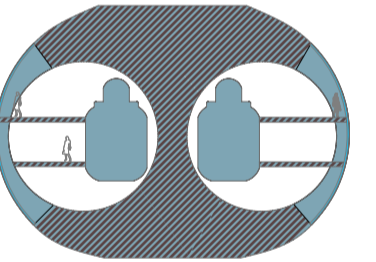

A VERTICAL COMMUNICATION-SYSTEM GETS YOU TO THE ROOF OF THE AQUARIUM. FROM HERE YOU CAN ENTER THE TYPHOON WHEN THE FIN OF IT RISES TO THE SURFACE. WHEN THE SUBMARINE IS YET AGAIN SUBMERGED, ONE CAN EXPERIENCE THE AQUATIC ENVIRONMENT WITHIN THE AQUARIUM THROUGH LARGE GLASS PANELS WHEN YOU TRAVEL THROUGH THE RESEARCH FACILITIES, AQUATIC ADVENTURE CENTER OR WITHIN THE HOTEL SECTION.
